Re: IB Docket 11-109

Dear Ms. Dortch,

My name is Hunter Coohill and I'm a student at the University of Colorado Boulder. I'm writing you to voice my support for LightSquared and the satellite technological innovations they have been working on. It is my understanding that allowing LightSquared to move forward with their broadband ideas would be great for consumers nationwide.

I'm an avid hiker and have climbed many of Colorado's 14er's and would love to be able to make phone calls when I'm out in the mountains. LightSquared's satellite technology amazes me and it truly stands out as a grand technological leap in the broadband era. I've read that this could cause some interference issues with GPS services however it is my understanding that LightSquared has been working on creative solutions to overcome some of these challenges.

Sincerely yours,

Hunter Coohill
